It's unfortunate that a minority of Christians can voice their opinions so loudly and stupidly.

Yet it is very inexpensive.

From an economic point of view, this attempt to guide strategy by good-vs-evil morality is worse than silly; it is just dead wrong.

Wiley was a state chemist who had gone to Washington in 1828. Born in southern Indiana, he had been trained as a doctor, though he never practiced.

You're really all so sweet as well as thoughtful of others, plus reading the blog posts is a great delight to me.

The position will require repetitively lifting and carrying up to 75 pounds and manipulating upwards of 200 lb.

One 2010 report found that some Japanese feared an earthquake in that country following oarfish sightings prior to destructive tremors in Chile and Haiti.
